

1. In retrospect, what could you have done better to reduce the time you spent solving this homework?

I could have first reviewed existing functionality from previous homework's so I would have spent less time thinking about what I needed.

2. What could I (the instructor) have done better to improve your learning experience in this homework?

Would have been helpful to indicate in the instructions that we cannot import hw7 into hw6, and that we should add classes to hw6 if necessary.

3. What do you know now that you did not know before beginning the homework?

How to make and run a simple interface in Eclipse, how to reroute input and output streams, and how to utilize .test and .expected files.
