

Please answer the following questions in a file named `reflection.pdf` in your `hw1/answers/` directory. Answer briefly, but in enough detail to help you improve your own practice via introspection and to enable me to improve Principles of Software in the future.

1. In retrospect, what could you have done better to reduce the time you spent solving this homework?

I should have looked at things said in the discussion forum earlier. I also could have looked over the slides again before starting.

2. What could I (the instructor) have done better to improve your learning experience in this homework?

You could have emphasized more on how we should format wp statements for backward reasoning, especially for #5. Also, the change in format between #5 and #4 on the 6/11 quiz was too jarring.

3. What do you know now that you did not know before beginning the homework?

Forward and Backward reasoning are not hard once you are able to organize your work with good or proper format.
